DEFINITIONS AND FORMULAS iv

POPULATION 1

July 1, 1984 estimates and April 1, 1980 census of population of States 2
July 1, 1981-85 estimates and April 1, 1980 census of population of Idaho districts and counties 3
Percent change, 1980-1985, Idaho counties *(map)* 4
July 1, 1984 estimates of population of Idaho cities 5
April 1, 1980 census of population by age and sex *(Idaho districts, counties)* 8
April 1, 1980 census of population of Idaho, by age and sex 12

TRENDS AND SUMMARY 13
Trends of Idaho vital events 13
Vital statistics, 1976-1985 15
Summary of 1985 vital statistics *(districts, counties)* 17
Summary of 1985 infant, fetal, perinatal mortality *(districts, counties)* 18

NATALITY 19
Live births and rates, 1981-1985 *(districts, counties)* 21
1985 Live births: sex and race *(districts, counties)* 22
1985 Live births: age of mother *(districts, counties)* 23
1985 Live births: attendant at birth *(districts, counties)* 24
1985 Live births: place of birth *(districts, counties)* 25
1985 Live births: birth and fertility rates *(U.S., Idaho, districts, counties)* 26
1985 Live births: live birth order by age of mother 27
1985 Live births: age-specific fertility rates *(U.S., Idaho)* 27
1985 Live births: trimester prenatal care began *(districts, counties)* 28
1985 Live births: education of mother *(districts, counties)* 29
1985 Live births: prenatal care by education of mother 30
1985 Live births: complications and malformations 30
1985 Live births: complications and malformations by prenatal care 31
1985 Live births: APGAR scores 31
1985 Immature live births: race of mother *(districts, counties)* 32
1985 Immature live births: age of mother *(districts, counties)* 33
1985 Immature live births: live birth order by age of mother 34
1985 Immature live births: age-specific immaturity rates 34
1985 Immature live births by weight categories *(districts, counties)* 35
Out-of-wedlock live births 36
1985 Out-of-wedlock live births: race of mother *(districts, counties)* 38
1985 Out-of-wedlock live births: age of mother *(districts, counties)* 39
1985 Out-of-wedlock live births: live birth order by age of mother 40
1985 Out-of-wedlock live births: age-specific ratios 40

MORTALITY 41
Deaths and rates, 1981-1985 *(districts, counties)* 43
1985 Deaths: sex and race *(districts, counties)* 44
1985 Deaths: age at death *(districts, counties)* 45
1985 Deaths: ten leading causes, by sex *(U.S., Idaho)* 46
1985 Deaths: ten leading causes by age group 47
1985 Deaths: malignant neoplasms by site 51
1985 Deaths: selected causes *(U.S., Idaho, districts, counties)* 52
1985 Accidental deaths occurring in Idaho: category by age 54
Years of potential life lost, Idaho, 1980-1985 *(special report)* 56
Reported morbidity from selected diseases, 1981-1985 59
1985 Reported morbidity from selected diseases *(districts, counties)* 60

Infant, fetal, maternal mortality 62
Infant deaths and rates, 1981-1985 *(districts, counties)* 64
1985 Infant deaths: sex and race *(districts, counties)* 65
1985 Infant deaths: causes of death, neonatal and postneonatal 66
1985 Infant deaths: causes of death *(districts, counties)* 67
1985 Infant deaths: neonatal, postneonatal *(districts, counties)* 68
Stillbirths and ratios, 1981-1985 *(districts, counties)* 69
Perinatal deaths and ratios, 1981-1985 *(districts, counties)* 70

INDUCED ABORTION 71
Induced abortions in Idaho, 1978-1985 *(counties)* 71
1985 Induced abortions in Idaho and to Idaho residents *(districts, counties)* 72
1985 Induced abortions to Idaho residents: ratios and race *(districts, counties)* 73
1985 Induced abortions to Idaho residents: age of patient *(districts, counties)* 74
1985 Induced abortions in Idaho: procedure by gestation 75
1985 Induced abortions in Idaho: complications by procedure 75
1985 Induced abortions in Idaho: age of patient by marital status 76
1985 Induced abortions in Idaho: previous abortions, living children 76

MARRIAGE AND DIVORCE 77
Marriages, 1976-1985 *(districts, counties)* 78
1985 Marriages: age of bride by age of groom 79
1985 Marriages: race of bride by race of groom 79
1985 Marriages: age of bride by marital status 80
1985 Marriages: age of groom by marital status 81
Divorces, 1976-1985 *(districts, counties)* 82
1985 Divorces: number of children affected 83
1985 Divorces: legal grounds 84
Divorces, 1983-1985: duration of marriage 85

APPENDIX 87
Appendix A: Vital statistics profile of Idaho by district and county 87
Appendix B: Detailed causes of death by age 94

ABOUT THE COVER:

The theme for this year's report is Idaho foods. Each cover/divider page depicts a different aspect of the state's food industries, complete with representative recipes. (This is not an exhaustive listing of all food industries in Idaho, but is intended to be a representative sample.)

Covers

Front	Grain
Back	Fish/Wild Game

(Narrative and recipes for covers begin on page 108)

Dividers

Population	Dairy
Trends and Summary	Vegetables
Natality	Beef
Mortality	Potatoes
Induced Abortion	Sheep
Marriage and Divorce	Fruit
Appendix	Poultry

Bureau of Printing Services

DEFINITIONS AND FORMULAS

RESIDENCE DATA — data allocated by place of residence of the decedent (deaths), or by place of residence of the child's mother (births, fetal deaths).

OCCURRENCE DATA — data allocated by place where event occurred, regardless of the person's place of residence (marriages, divorces).

LIVE BIRTH — a birth that shows any sign of life after delivery.

(CRUDE) BIRTH RATE — number of live births per 1,000 population.

$(\frac{\text{live births}}{\text{population}} \times 1{,}000)$

FERTILITY RATE — number of live births per 1,000 women 15-44 years of age.

$(\frac{\text{live births}}{\text{females 15-44}} \times 1{,}000)$

OUT-OF-WEDLOCK RATIO — number of out-of-wedlock live births per 1,000 live births.

$(\frac{\text{out-of-wedlock live births}}{\text{live births}} \times 1{,}000)$

IMMATURE BIRTH — a live birth weighing 2500 grams (5½ pounds) or less.

IMMATURE BIRTH RATE — number of immature live births per 1,000 live births.

$(\frac{\text{immature live births}}{\text{live births}} \times 1{,}000)$

STILLBIRTH — a spontaneous fetal death of at least 20 weeks gestation or a weight of at least 350 grams (does not include any induced abortions).

STILLBIRTH RATIO — number of stillbirths per 1,000 live births.

$(\frac{\text{stillbirths}}{\text{live births}} \times 1{,}000)$

INFANT DEATH — death of an infant under one year of age.

INFANT DEATH RATE — number of infant deaths per 1,000 live births.

$(\frac{\text{infant deaths}}{\text{live births}} \times 1{,}000)$

NEONATAL DEATH — death of an infant within the first 27 days of life.

NEONATAL DEATH RATE — number of neonatal deaths per 1,000 live births.

$(\frac{\text{neonatal deaths}}{\text{live births}} \times 1{,}000)$

PERINATAL DEATH — includes stillbirths and deaths to infants within the first six days of life.

PERINATAL DEATH RATIO — number of perinatal deaths per 1,000 live births.

$(\frac{\text{perinatal deaths}}{\text{live births}} \times 1{,}000)$

MATERNAL DEATH — death attributable to complications of pregnancy, childbirth, or the puerperium.

MATERNAL DEATH RATE — number of maternal deaths per 10,000 live births.

$(\frac{\text{maternal deaths}}{\text{live births}} \times 10{,}000)$

(CRUDE) DEATH RATE — number of deaths per 1,000 population.

$(\frac{\text{deaths}}{\text{population}} \times 1{,}000)$

CAUSE-SPECIFIC DEATH RATE — number of deaths from a specific cause per 100,000 population.

$(\frac{\text{deaths from specific cause}}{\text{population}} \times 100{,}000)$

Population

United Dairymen of Idaho

Dairy

Idaho Historical Society

A single food item - milk - becomes a myriad of calcium-rich products when processed. Idaho's dairy industry, ranging from small to large, gives us such culinary delights as ice cream, butter, cheese, cream and cottage cheese, as well as many other delicious products.

DAIRY

HUEVOS RANCHEROS

2 (28 oz.) cans tomatoes (stewed)
2 small onions, finely chopped
¾ c. Jack or Muenster cheese
¾ c. sharp Cheddar cheese
4 jalapenos (hot green chili peppers), seeded
2 tsp. oregano
Salt and pepper to taste
4 cloves garlic, minced
2 dashes Tabasco sauce
Olive oil to saute
8 poached eggs
4 toasted tortillas

Saute onion and garlic in olive oil. Add tomatoes, oregano and Tabasco. Add jalapenos (chop them fine), salt and pepper; taste for seasoning. Simmer in a heavy kettle until sauce is reduced by half. Fix eggs and fry tortillas. To assemble, put tortilla on plate, eggs on top and cover with sauce. Sprinkle the cheese (mix together) on top. **Fantastic**. Heat in oven to melt the cheese.

Catholic Women of the Altar, Holy Rosary Parish (Idaho Falls), **Country Cookin'** Cookbook Publishers, Lenexa, KS, 1983.

ALMOND CHEESE LOGS - Makes 2 logs

1 cup shredded Swiss cheese
2 cups shredded sharp Cheddar cheese
1 pkg. (8 oz.) softened cream cheese
¼ cup butter, or margarine, softened
1 Tbsp. grated onion
1 tsp. Worcestershire sauce
¼ tsp. cayenne or Tabasco
1 tsp. lemon juice
½ tsp. dry mustard
¾ cup chopped toasted almonds
Melba toast or crackers

Mix all ingredients except almonds and melba toast. Shape into two 8-inch logs, 1½ to 2 inches in diameter. Pat almonds evenly over logs. Wrap in plastic wrap or aluminum foil; refrigerate at least 1 hour and no longer than 3 weeks. Slice to serve with melba toast. This may be frozen.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection**, Highcountry Publishers, Boise, ID

POPULATION

Each year, the population estimates for Idaho are made available by the Federal-State Cooperative Program for Local Population Estimates. All vital rates are based on provisional 1985 estimates unless otherwise specified. Also included are estimates for 1981-84. Vital rates for those years have been adjusted.

Since the 1980 census, Idaho's population has grown by 6.4%, and now numbers 1,005,000. The chart on the following page shows that Idaho was the 16th fastest growing state from 1980 to 1984 (State estimates are not yet available for 1985). Alaska had the highest growth rate (24.4%) in the nation for the same period (1980-84). Most states experiencing a rapid rate of growth are in the western part of the nation.

In Idaho, the fastest growing area from 1980-85 was District 4 (central Idaho), with a growth rate of 10.0%. District 7 (northeast) and District 5 (south central) grew by 8.0% and 7.6%, respectively. District 2 (north central) experienced a 0.9% growth, the lowest for the period.

At the county level, the fastest growing county was Custer, with a growth rate of 53.2%, although it dropped 16.1% from 1984 to 1985; Blaine County was second with a growth rate of 31.2%. Twelve counties lost population; Shoshone County had the highest rate of loss of 12.7%.

The largest numerical increase occurred in Ada County (18,400), followed by Kootenai and Canyon Counties with increases of 7,400 and 5,400, respectively; Shoshone County lost the most numerically (-2,400).

Also in this issue are the latest population estimates for Idaho cities as of July 1, 1984. These estimates have also been made available by the Federal-State Cooperative Program for Local Population Estimates. For the period 1980-84, the cities of Challis and Clayton, both in Custer County, had the highest rate of population gain, 107.3% and 104.7%, respectively. This increase reflects the fact that Custer County as a whole had the highest rate of gain for 1980-85. Three of the four cities experiencing the highest rates of loss are in Shoshone County.

PROVISIONAL POPULATION ESTIMATES OF STATES

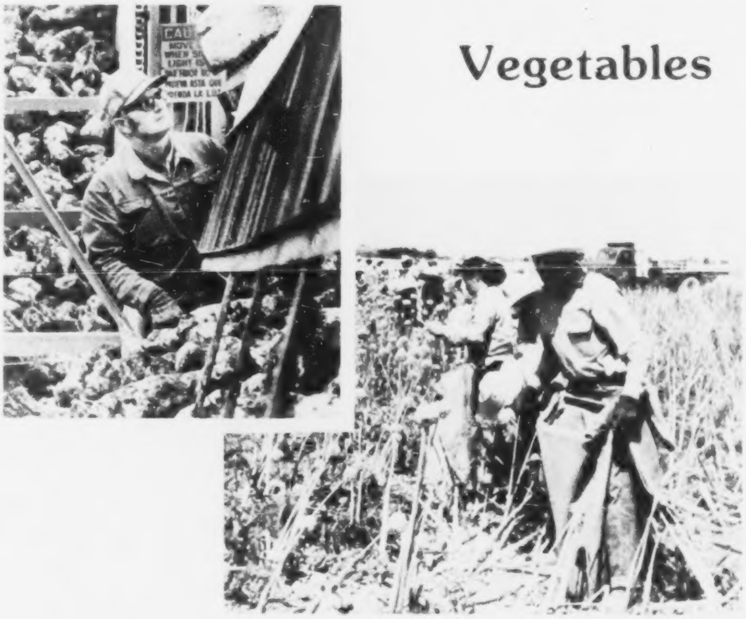
Trends and Summary

FILER EXHIBIT

Vegetables



Idaho Historical Society

A wide variety of vegetables are commercially grown throughout Idaho, including peas, beans, sugar beets, onions and corn. In addition, the bounty of numerous home gardens are often displayed at local county fairs.

VEGETABLES

CORN CASSEROLE

- 1 can cream-style corn
- 1 can niblet corn
- 2 Tbsp. onion flakes or ¼ cup chopped onion
- 1 medium green pepper, chopped fine
- 1 cup sour cream
- 1 tsp. salt
- ¼ tsp. freshly ground pepper
- 2 eggs, beaten slightly and added to above
- ⅓ cup browned, buttered bread crumbs

Mix together except for bread crumbs, which should be sprinkled on top. Bake at 350° for 1½ hours. Serves 9.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection.** Highcountry Publishers, Boise, ID.

OLD-FASHIONED BEAN SOUP

¼ cup of each:

- black-eyed peas
- pinto beans
- small white or navy beans
- split peas
- barley
- red beans
- baby lima beans
- lentils

Wash beans thoroughly; place in large kettle and cover with water. Add 2 Tbsp. salt; let soak overnight. Drain. Add 2 quarts fresh water and ham hock (or about 2 cups cut-up ham pieces), bring to boil and simmer slowly 2½ - 3 hours. Remove ham; trim, chop and return good parts.

Add:

- 1 large chopped onion
- 1 large can tomatoes
- 2 tsp. chili powder
- juice from one lemon (about 2 Tbsp.)
- salt and pepper to taste

Simmer 1 - 1½ hours (lid off to thicken if necessary). Yield: 10-12 servings.

This delightful recipe has "made the rounds" at numerous bazaars, etc. The source is unknown.

TRENDS IN IDAHO

BIRTHS .... Reversing the pattern of the 1970's, the Idaho birth rate has decreased the last six years. At 17.5 (provisional), it stands at the lowest level ever recorded. The number of births has declined to its lowest point since 1976, even though the population has grown considerably. In 1985, 17,539 births occurred to Idaho mothers, a decrease of 3%.

OUT-OF-WEDLOCK BIRTHS ... Out-of-wedlock births increased 13% in 1985 to 1,880 (107.2 per 1,000 live births). This is both the highest ratio and highest number of out-of-wedlock births ever recorded in Idaho. For the first time, over 10% of all Idaho live births were to unmarried mothers. Districts 3 and 1 continue to record the highest ratios, with District 2 a close third.

DEATHS.................. The number of Idaho deaths decreased 2% in 1985 to 7,105. The rate of death has ceased the downward trend in evidence during the sixties and seventies, although dropping slightly from 7.2 in 1984 to 7.1 (provisional) in 1985.

STILLBIRTHS .... Both the number and ratio of stillbirths change little from year to year, although a general decline has been evident over the last several years. In 1985, 119 stillbirths occurred, for a ratio of 6.8 per 1,000 live births, a decrease over the 1984 ratio of 7.8.

INFANT DEATHS .... Infant deaths are also subject to fluctuations because of the small data base. Generally, infant mortality in Idaho has declined considerably, although the last five years have not seen much change. A total of 183 infant deaths occurred in 1985, compared to 174 in 1984. The 1985 rate was 10.4. Neonatal deaths rose from 5.1 in 1984 to 6.3 in 1985; postneonatal deaths decreased from 4.6 in 1984 to 4.2 in 1985.

MATERNAL DEATHS .... Two Idaho residents died from complications related to childbirth in 1985 (1.1 per 10,000 live births).

MARRIAGES............... The number and rate of Idaho marriages declined from 13,264 (13.3) in 1984 to 12,277 (12.2, provisional) in 1985. The number of marriages is still higher than those recorded in the mid-seventies, but 1985 marks the fourth consecutive year of a decline. The rate of marriage is also declining, and at 12.2 is at its lowest point in decades.

DIVORCES .... After sixteen years of annual increases, the number of divorces in Idaho has decreased for four straight years. In 1981, a record-high 6,770 divorces were granted, but only 6,207 occurred in 1985. The rate of divorce has also been declining. At 6.2 (provisional) per 1,000 population, it is unchanged from 1984, which was the lowest rate since 1974.

Idaho Cattle Assn

Beef

Idaho Historical Society

Cattle are grown in all areas of Idaho, from feedlots to small family pastures to backcountry ranges. Long a main source of protein in American diets, Idaho beef is becoming leaner as the public becomes more "health-conscious." In addition to being a commercial enterprise, beef are often grown by young people for exhibiting as a 4-H, FFA, or similar project.

BEEF

EASY WAY TO COOK A ROAST

Preheat over to 500°. Put roast in pan, cover and cook:

5 minutes per lb. for rare
6 minutes per lb. for medium
7 minutes per lb. for well-done

Turn oven off and do not open door for 2 hours. Perfect every time. This is a good way to cook rump roast or any tender cut roast.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection**. Highcountry Publishers, Boise, ID.

PEPPER STEAK

1 lb. round steak, cut in strips
1 can beef broth
1 medium onion, chopped
2 green peppers in strips
¼ c. water
¼ c. soy sauce
½ can tomatoes

Brown steak, add broth and onion and simmer 30 minutes. Add green pepper and cook 5 minutes more. Add water and soy sauce and cook another 5 minutes. Add tomatoes and cook until heated through. Serve over rice.

Sheila Schneiter

Catholic Women of the Altar, Holy Rosary Parish (Idaho Falls), **Country Cookin**! Cookbook Publishers, Lenexa, KS, 1983.

CURRIED BEEF STIR-FRY

Freezing time: 30 minutes
Preparation time: 15 minutes
Cooking time: 13 minutes

1 pound beef top round steak, cut ¾-inch thick
2 tablespoons light soy sauce
1 tablespoon dry sherry
1 medium green pepper, cut into 1-inch pieces
1 medium onion, cut into 1-inch pieces
3 tablespoons cooking oil, divided
2 teaspoons brown sugar
1 large tomato, cut into 8 wedges
1 tablespoon curry powder
1 teaspoon cornstarch
2 tablespoons catsup

Partially freeze steak to firm and slice into strips ⅛ thick. Combine soy sauce and dry sherry. Pour over beef strips and stir; reserve. Stir-fry green pepper and onion in 1 tablespoon hot oil in wok or large frying pan 3 to 4 minutes. Remove from wok; sprinkle brown sugar over green pepper, onion and tomato wedges. Heat remaining oil. Add curry powder; heat and stir, about 1 minute. Drain beef strips; reserve marinade. Combine reserved marinade and cornstarch. Stir-fry beef strips (half at a time) in hot seasoned oil 2 to 3 minutes. Return vegetables to wok. Stir in marinade and catsup; cover and cook 2 minutes. Stir before serving. 4 servings.

Idaho Beef Council, Boise, ID.

NATALITY

One percent more infants were born in the United States in 1985 than in 1984, slightly less than the 2% increase last year. The birth rate of 15.7 was unchanged from the 1984 rate; at 66.1 births per 1,000 women 15-44 years of age, the fertility rate remained virtually the same as in 1984 (66.0). According to the National Center for Health Statistics, the one percent increase in the number of births, coupled with virtually no change in the fertility rate, seems to indicate that the increase in the number of births occurred because of a higher number of women in the child-bearing years. The number of women 15-24 years of age continues to decline, while the number of women aged 25 years and over increased.

Contrary to the national trend, Idaho experienced a decline in both the number and rate of births in 1985: the number of live births fell 3% in 1985 following a 4% decline in 1984, and the birth rate was down by 3%. Since 1979, Idaho's birth rate has declined 21%. Idaho's 1985 estimated fertility rate was 74.9 live births per 1,000 women 15-44 years of age. This represents a slight decrease from 78.1 in 1984 (revised). In comparison, the 1985 national rate was 66.1. Idaho's fertility rates have always been substantially higher than the U.S. rates, but the difference is diminishing: in 1979, Idaho's rate was 43% higher; in 1985, the difference was only 13%, a fairly rapid turnaround.

Birth rates in Idaho in 1985 ranged from 14.5 in District 2 to 20.6 in District 7. Birth rates fell in every district in 1985. They do not vary widely from year to year, in that areas in the northern and southwestern parts of Idaho traditionally experience much lower birth rates than the southeastern areas, but the general trend has definitely been downward for all districts.

Three percent of Idaho's 1985 births occurred in a nonhospital setting (down from 4% in 1984), of which 63% were at home. All the remainder of nonhospital births were in physicians' clinics. Home births occurred most frequently in District 1; most of the clinic births were in District 3.

Lay midwives, certified nurse midwives (C.N.M.'s) and naturopaths were the most popular alternatives of those mothers who did not choose a physician-attended birth. The districts vary distinctly in this area, as shown on page 24.

OUT-OF-WEDLOCK BIRTHS

Idaho out-of-wedlock live births increased a substantial 13% in 1985 (from 1,668 to 1,880) in spite of a 3% decrease in the total number of live births. The ratio of out-of-wedlock births to total births rose 16% from 92.4 to 107.2. Both number and rate are the highest ever recorded in Idaho. The 1985 out-of-wedlock ratios **increased** from 1984 for all races, but if one considers the 1982-1985 period, only whites and blacks recorded increases (see below).

IDAHO RACE-SPECIFIC RATIOS

	1985	1984	1983	1982	Change 1982-85
White	101.7	89.2	89.0	84.0	+21.1%
Black	250.0	189.2	156.9	148.1	+68.8
American Indian	390.7	352.2	493.3	415.9	-6.1
Japanese	31.3	0.0	66.7	57.7	-45.8
Other nonwhite	72.6	41.7	81.5	103.4	-29.8
Spanish surname*	180.1	132.4	139.6	144.1	+25.0

The national out-of-wedlock live birth ratio increased in 1983 (the latest data available) to 202.8; this reflects higher ratios for whites, blacks, and other nonwhites. The U.S. ratio is nearly twice as high as Idaho's, although the differential varies by race: national white ratios are only 26% higher, whereas nonwhite ratios are 84% higher than Idaho's.

			Nonwhite		
	Total	White	Total	Black	Spanish Surname*
U. S. (1983)	202.8	127.7	499.5	582.0	NA
Idaho (1985)	107.2	101.7	271.0	250.0	180.1

When comparing U.S. and Idaho ratios, one should keep in mind several influencing factors:

1. Idaho has a higher birth rate than the nation as a whole; since live births provide the base (denominator) for computing out-of-wedlock ratios, the higher the number of births, the lower the ratio.
2. Idaho has a small nonwhite population; their higher out-of-wedlock ratios have less effect on the overall ratio.
3. The U.S. ratios shown above lag two years behind Idaho's; undoubtedly the 1985 U.S. ratios will be even higher than in 1983.
4. Idaho has a relatively small data base, so some fluctuation is not unexpected.

The map on page 37 demonstrates that Districts 3, 1 and 2 experienced the highest out-of-wedlock ratios, with 148.0, 139.6 and 126.6, respectively. Payette was the highest county at 202.2, followed by Nez Perce (191.1), Shoshone (181.8) and Benewah (176.5).

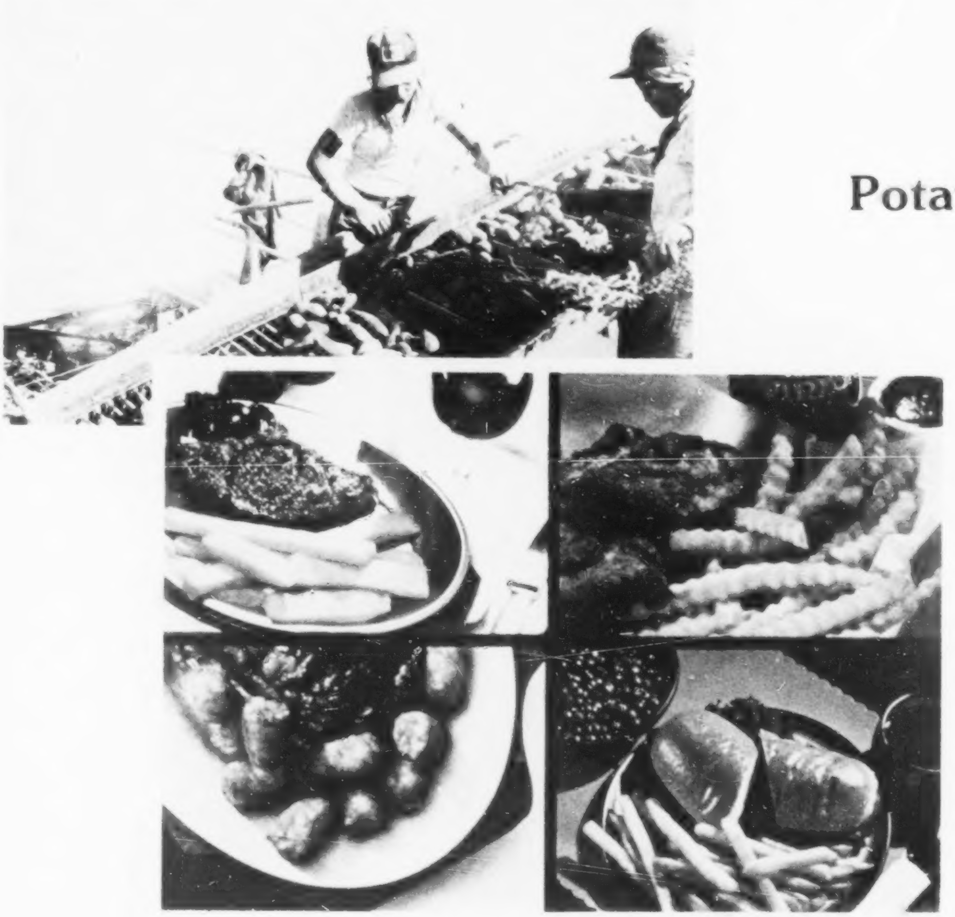
Mortality

Idaho Historical Society



Potatoes

Idaho Historical Society

Potatoes are almost synonymous with Idaho, and with good reason. Everyone knows that an Idaho potato is without equal, and its versatility is almost limitless. Potatoes have long been a mainstay of the state's agricultural economy; the photos above illustrate harvesting methods used in 1910 and 1978.

POTATOES

LOW CALORIE BAKED POTATO TOPPING

1 cup (8 ounces) cottage cheese
1 tablespoon chopped parsley
¾ teaspoon chopped chives
⅛ teaspoon dried dill weed
¼ teaspoon salt
1/16 teaspoon pepper

In a small bowl beat cottage cheese until smooth. Add parsley, chives, dill weed, salt and pepper; mix well.

YIELD: 1 cup; enough topping for 4 potatoes.

Idaho Potato Commission, Boise, ID.

BASQUE POTATO SOUP

1 pound Chorizo or Italian sausage, sliced
½ cup chopped onion
2 cans (1 pound each) tomatoes
4 Idaho potatoes, pared and diced (6 cups)
¼ cup chopped parsley
1 cup diagonally sliced celery
2 tablespoons chopped celery leaves
1½ cups water
2 beef bouillon cubes
1 bay leaf
1 tablespoon salt
½ teaspoon dried leaf thyme
¼ teaspoon pepper
1 tablespoon lemon juice

In large saucepan or kettle, brown sausage over medium heat. Add onion and cook 5 minutes. Add remaining ingredients. Bring to a boil, reduce heat and simmer uncovered 40 minutes, or until potatoes are tender.

YIELD: 6 servings.

Idaho Potato Commission, Boise, ID.

IDAHO BEEF BAKER

2 large baking potatoes
½ pound ground beef
1 (1¼-ounce) package taco seasoning mix
3 tablespoons sour cream
4 slices bacon, cooked and crumbled
1 tablespoon green onion, sliced
3 tablespoons shredded Cheddar cheese
2 tablespoons butter or margarine
1 teaspoon chives.

Bake potatoes and set aside. Brown ground beef, drain and add taco seasoning mix according to package directions. Combine remaining ingredients. Split potatoes in half, top with meat mixture and sour cream mixture. Yield: 2 servings.

Jo Lucas, Elmore County (Mountain Home)

American Cancer Society, Idaho Division, **Idaho Sampler Cookbook.** *Wimmer Brothers Books, Memphis, TN, 1984.*

MORTALITY

After a small 0.3% rise in 1984, Idaho deaths dropped 2% in 1985 to 7,105. Even though the rate of death dropped from 7.2 in 1984 to 7.1 (provisional) in 1985, it appears that Idaho's death rate has ceased its long-term downward trend, as no significant changes have been noted since the mid- to late-seventies. The U.S. death rate was 8.7 in 1985, unchanged from 1984. Comparing the national death rate with Idaho's reveals that Idaho rates have historically been lower. Age-adjusted rates* show that even allowing for the differing age structures (Idaho's population is younger), Idaho's death rate is below that of the nation.

The five leading causes of death are: (1) Heart disease, (2) Malignant neoplasms, (3) Cerebrovascular disease, (4) Accidents and (5) Chronic obstructive pulmonary disease (COPD). (COPD was not listed as a single cause prior to 1984; it consists of ICD-9 codes 490-496, and includes, but is not limited to, the Bronchitis, emphysema and asthma designation previously used.) These leading five causes are the same for both the U.S. and Idaho. The ranking of the next five causes used to be very different, but have become nearly alike, the notable exception being Chronic liver disease and cirrhosis (rates are deaths per 100,000):

Causes ranked 6-10 in U.S.	Rank in Idaho
6. Pneumonia and influenza (28.0)	6 (22.3)
7. Diabetes mellitus (15.8)	7 (13.4)
8. Suicide (11.6)	8 (13.3)
9. Chronic liver disease and cirrhosis (11.2)	13 (5.4)
10. Atherosclerosis (9.9)	10 (9.2)

Of the ten leading causes in the U.S. in 1985, **increases** were recorded in the rates of death from Chronic obstructive pulmonary disease and Pneumonia and influenza. Rates **decreased** for Cerebrovascular disease and Accidents.

Comparing Idaho's provisional 1985 rates with 1984 rates reveals that of the ten leading Idaho causes of death, rates **increased** for Cerebrovascular disease, Accidents (reversing a downward trend), Chronic obstructive pulmonary disease, Diabetes mellitus, Atherosclerosis, and Other diseases of arteries, arterioles and capillaries. **Decreases** were reported for Diseases of heart, Malignant neoplasms and Suicide.

When making comparisons of 1979-1985 mortality data with earlier years, one must be aware that the manner of coding the underlying cause of death changed in 1979 to the ninth revision of the **International Classification of Diseases** (ICD-9). The introduction of ICD-9 in all states has resulted in a major reclassification of several causes of death. Therefore, there are major discontinuities in the trends for certain causes of death. (Comparability ratios between ICDA-8 and ICD-9 have been published in the Vital Statistics Summaries, 1979-1982.)

**To eliminate the bias inherent in differing age compositions (an older population usually has a higher death rate simply because the risk of dying increases as one ages), age-specific death rates can be calculated. These rates are then applied to a standard population, often the U.S. population, and the composite, or "age-adjusted," death rate is then calculated. Five-year average (1968-1972) death rates were computed for Idaho counties using the U.S. as a standard population, and have been published in several earlier publications of this report.*

TEN LEADING CAUSES OF DEATH TO IDAHOANS

Cause - Specific Rates

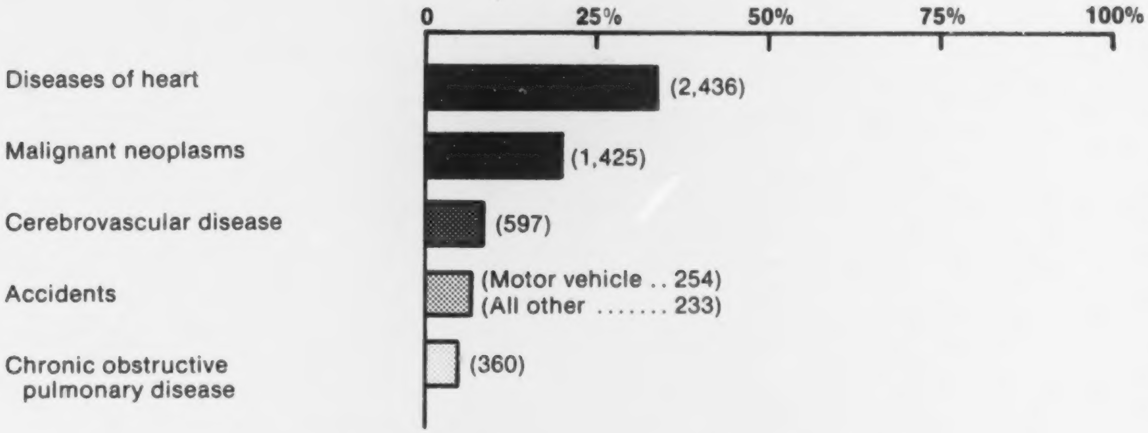
1985

	IDAHO				Provisional U.S.
	DEATHS		SEX		
CAUSE OF DEATH	Number	Rate	Male	Female	Rate
ALL CAUSES	7105	707.0	3893	3212	874.8
1. Diseases of the heart	2436	242.4	1358	1078	323.2
2. Malignant neoplasms	1425	141.8	788	637	192.5
3. Cerebrovascular disease	597	59.4	237	360	64.0
4. Accidents	487	48.5	344	143	38.1
--Motor vehicle accidents	254	25.3	175	79	18.3
--All other accidents	233	23.2	169	64	19.8
5. Chronic obstructive pulmonary diseases and allied conditions*	360	35.8	235	125	31.2
--Bronchitis, emphysema and asthma	107	10.6	68	39	9.0
--Other chronic obstructive pulmonary diseases and allied conditions	253	25.2	167	86	22.2
6. Pneumonia and influenza	224	22.3	103	121	28.0
7. Diabetes mellitus	135	13.4	50	85	15.8
8. Suicide	134	13.3	112	22	11.6
9. Other disease of arteries, arterioles and capillaries	110	10.9	74	36	8.8
10. Atherosclerosis	92	9.2	40	52	9.9
All other causes	1105	-	552	553	-

*"Bronchitis, emphysema and asthma" are now included in the broader cause, "Chronic obstructive pulmonary diseases and allied conditions."

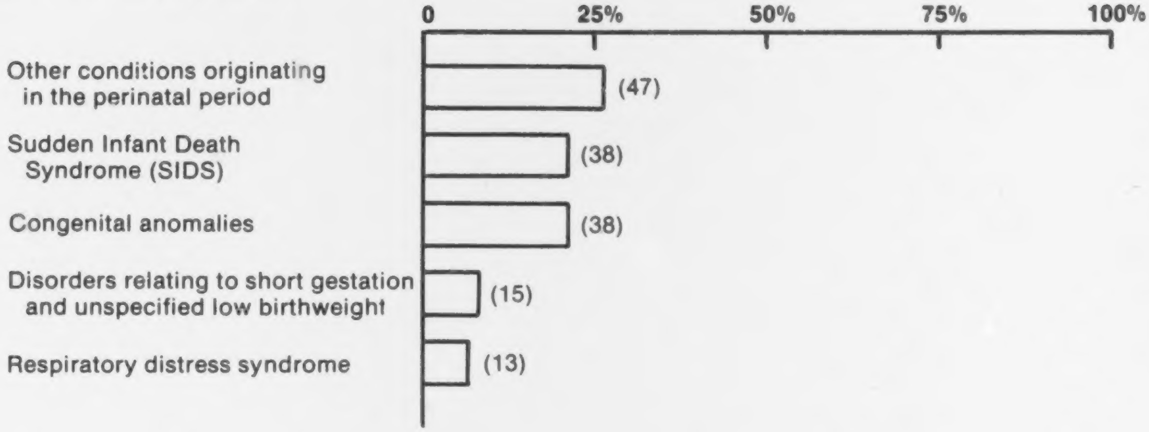
LEADING CAUSES OF DEATH BY AGE GROUP
IDAHO, 1985

ALL AGES (7,105 deaths)



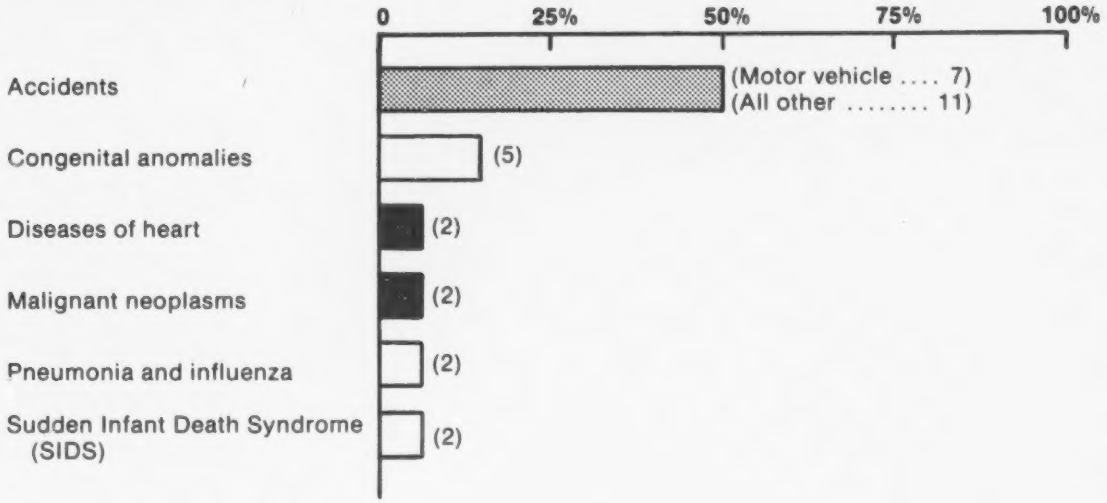
Other Causes	Deaths
Pneumonia and influenza	*224*
Diabetes mellitus	*134*
Suicide	*133*
Other diseases of arteries, arterioles and capillaries	*110*
Atherosclerosis	*92*

AGE: < 1 YEAR (183 deaths)

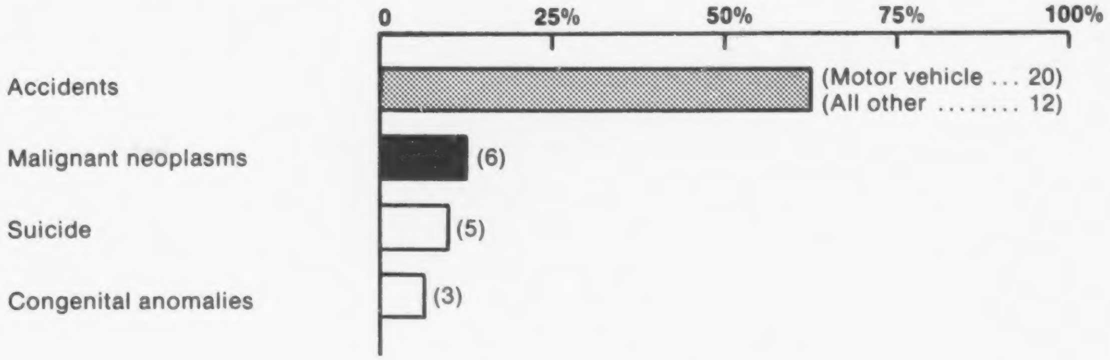


Other Causes	Deaths
Accidents	*5*
Motor vehicle	*3*
All other	*2*
Diseases of heart	*4*
Pneumonia and influenza	*2*
Nephritis and nephrosis	*2*
Septicemia	*2*

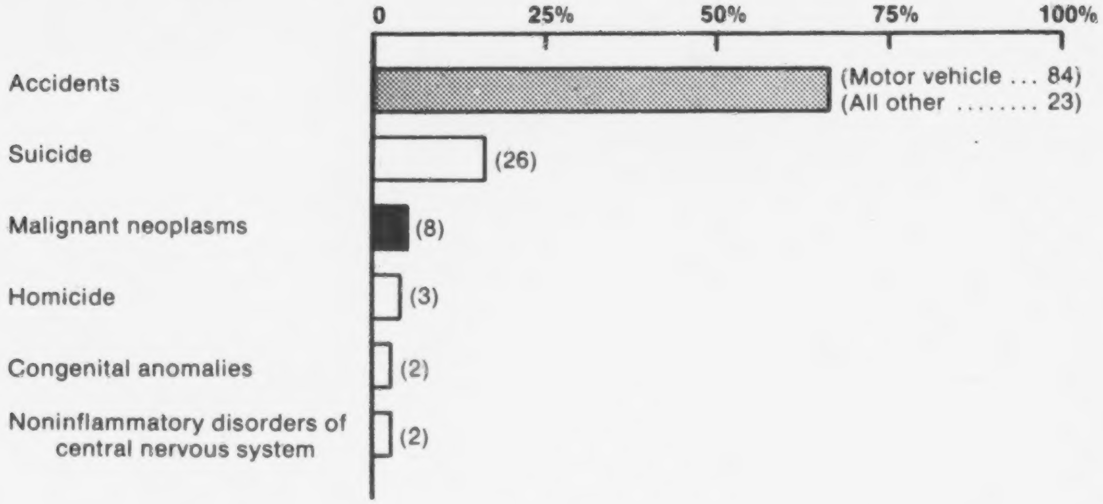
AGE: 1-4 YEARS (36 deaths)



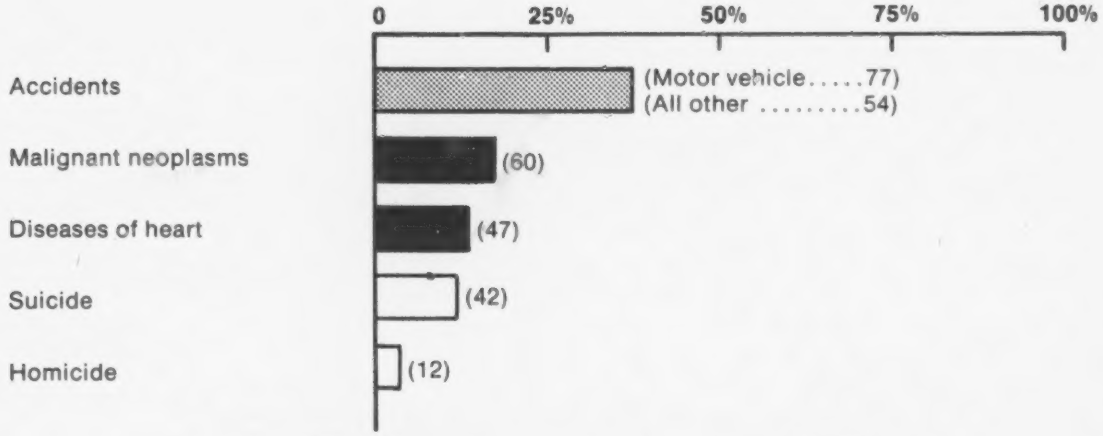
AGE: 5 - 14 YEARS (52 deaths)



AGE: 15-24 YEARS (162 deaths)

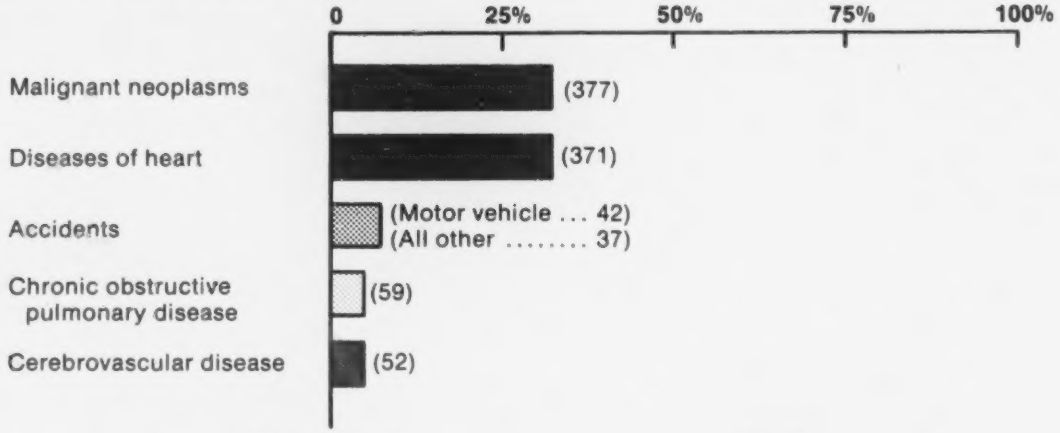


AGE: 25-44 YEARS (358 deaths)



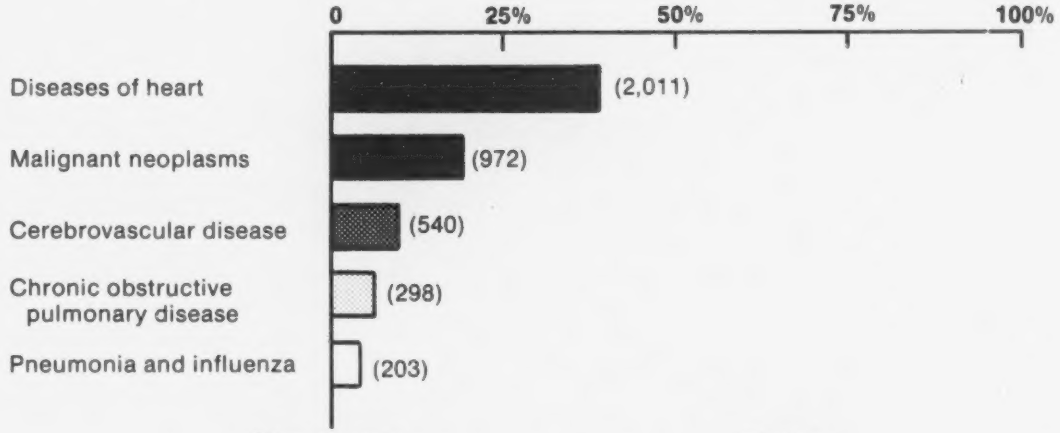
Other Causes	**Deaths**
Chronic liver disease and cirrhosis	7
Diabetes mellitus	6
Cerebrovascular disease	4
External cause, undetermined if accident, suicide or homicide	4
Pneumonia and influenza	3

AGE: 45-64 YEARS (1,163 deaths)



Other Causes	Deaths
Suicide	*31*
Diabetes mellitus	*22*
Chronic liver disease and cirrhosis	*22*
Other diseases of arteries, arterioles and capillaries	*17*
Pneumonia and influenza	*13*

AGE: 65+ YEARS (5,151 deaths)



Other Causes	Deaths
Accidents	*115*
Motor vehicle	*21*
All other	*94*
Diabetes mellitus	*106*
Other diseases of arteries, arterioles and capillaries	*91*
Atherosclerosis	*89*
Nephritis and nephrosis	*42*

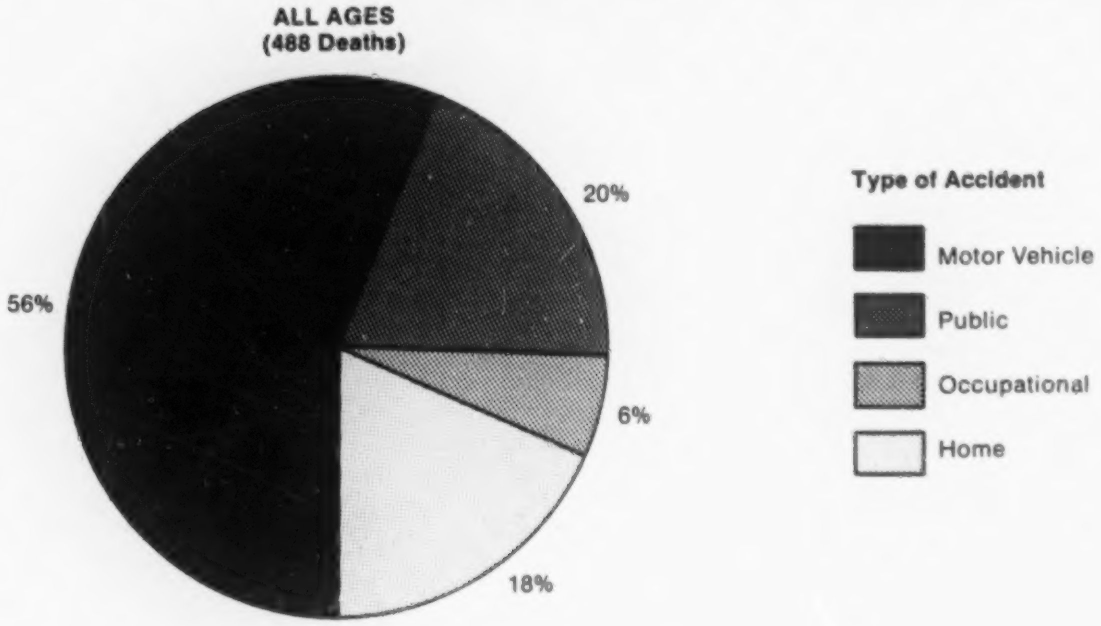
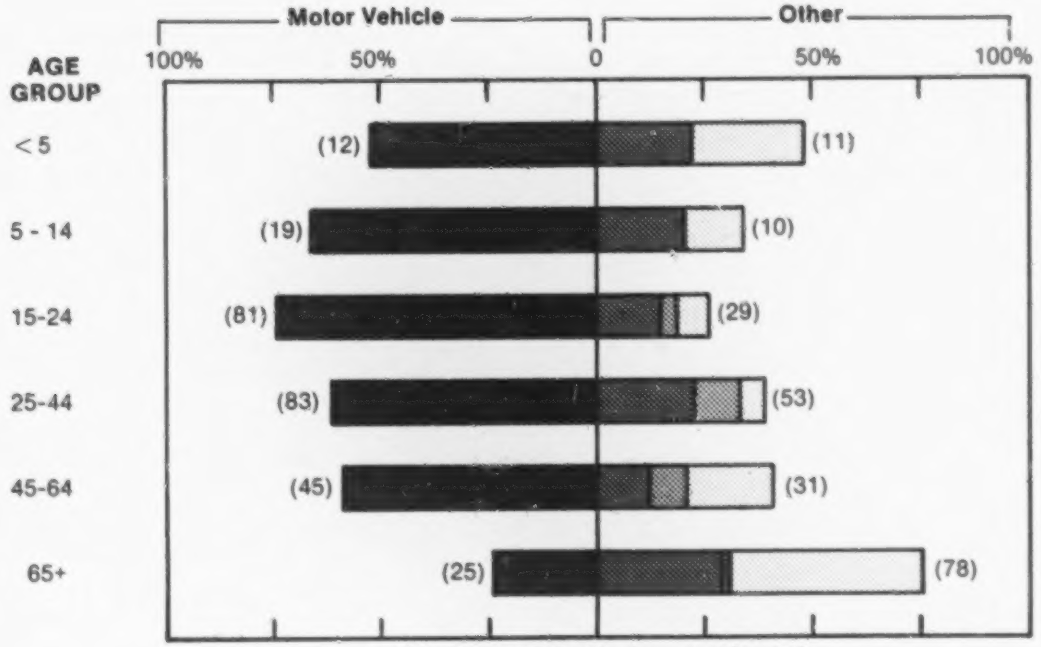
1985 ACCIDENTAL DEATHS OCCURRING IN IDAHO

Age and Category



CATEGORY BY AGE GROUP



(Numbers of deaths in parentheses)

YEARS OF POTENTIAL LIFE LOST (YPLL)

IDAHO

1980 - 1985

Years of potential life lost (YPLL) is a total of all years of life lost before the age of 65* (by cause of death), rather than simply a tally of numbers of deaths. In this manner, deaths occurring at younger ages are given greater weight.

Accidents are responsible for more premature mortality (YPLL) than any other cause. (Motor vehicle accidents by themselves are the leading cause of premature mortality.) Malignant Neoplasms occupy second position, followed by Certain Causes of Mortality in Early Infancy, Diseases of the Heart, Sudden Infant Death Syndrome, Congenital Anomalies, Suicide and Homicide. These rankings are different from crude mortality data, which show the eight leading causes of numbers of deaths as Diseases of the Heart, Malignant Neoplasms, Cerebrovascular Disease, Accidents, Pneumonia/Influenza, Chronic Obstructive Pulmonary Disease, Diabetes Mellitus and Suicide.

From 1980 to 1985, YPLL for most causes were down. The largest numerical decrease in YPLL was noted for Accidents (both motor vehicle and all other accidents recorded large decreases). By percentage, Chronic Liver Disease and Cirrhosis declined 48.7%, followed by Homicide (-45.2%), Cerebrovascular Disease (-40.5%) and Accidents (-29.2%). Only two causes in the leading 12 causes of YPLL showed increases, both small: Pneumonia and Influenza (+7.7%) and Suicide (+0.7).

The leading causes of premature male mortality are different from those for females. Although Accidents lead both lists, male YPLL from Accidents are nearly triple that for females. The largest difference in 1985 rankings can be noted for Homicide (#8 for males, not in leading 12 causes for females).

Between 1980 and 1985, premature male mortality declined for all causes except Chronic Obstructive Pulmonary Disease (+1.0%) and Sudden Infant Death Syndrome (+0.1%). The largest decreases were noted for Chronic Liver Disease and Cirrhosis (-39.6%), Cerebrovascular Disease (-37.2%), Homicide (-32.0%) and Accidents (-31.5%). Females also recorded increases in premature mortality from only two causes: Pneumonia and Influenza (+112.4%) and Suicide (+63.6%). The largest declines occurred for Chronic Liver Disease and Cirrhosis (-57.2%), Sudden Infant Death Syndrome (-50.0%), Cerebrovascular Disease (-42.9%) and Accidents (-22.3%).

As noted above, YPLL from accidental deaths, the leading cause of premature mortality for both sexes, were down for both males and females; overall, motor vehicle accidents declined 21.2%, and all other accidents were 40.6% less frequent.

(It should be noted that some of the data are based on relatively small numbers; caution should be exercised when interpreting.)

*Some changes in methodology have been made since the 1984 YPLL report, the most important of which is that deaths of infants under one year of age have been included.

INFANT, FETAL AND MATERNAL MORTALITY

The number of Idaho resident infant deaths increased from 174 in 1984 to 183 in 1985. Coupled with a decrease in the number of live births, the infant death rate rose from 9.6 to 10.4. Considering the size of the data base, such fluctuations are not unexpected, as is evidenced by the graph on the following page. However, it appears the trend toward lower rates in evidence over the past decades may have stopped. The neonatal death rate increased from 5.1 in 1984 (its lowest point ever) to 6.3 in 1985, while postneonatal deaths dropped from 4.6 to 4.2.

Infant mortality in the U.S. continued to decline from 10.7 in 1984 to 10.6 in 1985. Neonatal deaths increased from 6.8 to 6.9; postneonatal deaths dropped from 3.8 to 3.6 (all rates provisional). The difference between U.S. and Idaho infant mortality has narrowed considerably, and they are now virtually equal, a situation that has not occurred for some time (see graph on following page). The composition of the rates varies from year to year, with the lower Idaho neonatal death rates normally accounting for its lower overall infant death rates. Idaho's postneonatal deaths are usually higher than national rates; the higher incidence of SIDS in Idaho appears to account for much of that difference.

In Idaho, District 1 recorded the lowest 1985 infant death rate of 8.0. The highest rate (12.9) was again reported by District 7. Counties with the highest rates were Madison, Bear Lake and Nez Perce. Perinatal deaths occurred least frequently to District 1 residents (7.0), and most frequently to residents of District 5 (17.7). The highest perinatal death rates were experienced by Jerome, Madison and Twin Falls County residents.

Stillbirths (a component of perinatal mortality) decreased in 1985 to 6.8 per 1,000 live births, although perinatal mortality increased to 12.1. District stillbirth ratios range from 3.7 in District 2 to 9.4 in District 5.

There were two Idaho maternal deaths in 1985, one each to Ada and Owyhee County residents.

CAUSES OF IDAHO RESIDENT INFANT DEATHS

Neonatal and Postneonatal

1985

ICD-9 CODE	CAUSE OF DEATH	TOTAL		NEONATAL		POSTNEONATAL	
		Number	Rate	Number	Rate	Number	Rate
--	ALL CAUSES	183	10.4	110	6.3	73	4.2
008-009, 535, 555-558	Certain gastrointestinal diseases	1	0.1	1	0.1	-	0.0
480-487	Pneumonia and influenza	2	0.1	1	0.1	1	0.1
740-759	Congenital anomalies	38	2.2	28	1.6	10	0.6
765	Disorders relating to short gestation and unspecified low birthweight	15	0.9	15	0.9	-	0.0
767	Birth trauma	3	0.2	3	0.2	-	0.0
768	Intrauterine hypoxia and birth asphyxia	4	0.2	4	0.2	-	0.0
769	Respiratory distress syndrome	13	0.7	12	0.7	1	0.1
760-764, 766, 770-779	Other conditions originating in the perinatal period	40	2.3	36	2.1	3	0.2
798.0	Sudden Infant Death Syndrome	38	2.2	3	0.2	35	2.0
Residual	All other causes	30	1.7	7	0.4	23	1.3

Congenital anomalies were the leading single cause of infant deaths in the U.S. in 1985, but the second-leading cause in Idaho. The 1985 death rate in Idaho from congenital anomalies rose from 1.7 in 1984 to 2.2 deaths per 1,000 live births in 1985; the national rate increased from 2.3 to 2.4. The leading cause in Idaho in 1985 remains Sudden Infant Death Syndrome (SIDS). Although the rate decreased from 2.8 to 2.2, it is still considerably higher than the national rate of 1.4. Districts 6, 7 and 4 recorded the highest SIDS rates in 1985.

Although more neonatal deaths occurred in the general category, "other conditions originating in the perinatal period" (which includes such conditions as complications of pregnancy and delivery, infections, etc.), the leading single cause of neonatal deaths in Idaho was congenital anomalies (1.6 deaths per 1,000 live births). The second-leading cause was "disorders relating to short gestation and unspecified low birthweight" (0.9. deaths per 1,000 live births).

In the postneonatal period, SIDS accounted for 48% of the deaths; Idaho's rate of postneonatal deaths from SIDS was 2.0. Congenital anomalies were the second-leading cause of postneonatal mortality with a rate of 0.6.

Induced Abortion

Sheep

Idaho Historical Society

Sheep are raised mainly in the southern portions of Idaho. The Basque people have long been involved with sheepherding, particularly in earlier days.

LAMB

CHUTNEY GRILLED LAMB CHOPS

½ cup chutney, finely chopped	1 tsp. curry powder
2 Tbsp. melted butter or margarine	4 loin chops, ¾-inch thick
1 Tbsp. lemon juice	

Combine chutney, butter or margarine, lemon juice and curry powder. Place chops on rack in broiler pan or on barbeque grill; brush with half the chutney mixture. Broil 10 minutes, 3-4 inches from heat; then turn chops and brush with remaining chutney mixture. Broil 8-10 minutes more.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection**. Highcountry Publishing Co., Boise, ID

ROAST LAMB KARMA

- 1 (6 or 7-pound) leg of lamb
- 2 tablespoons grated fresh ginger root
- ½ cup yogurt
- 2 tablespoons lime juice
- 2 cloves garlic, crushed
- 2½ teaspoons salt
- ¼ teaspoon pepper
- 2½ teaspoons ground coriander (optional)
- ⅛ teaspoon cayenne pepper
- ¼ teaspoon ground cinnamon
- ¼ teaspoon ground cloves
- ¼ teaspoon ground cardamom
- 1¼ cups water
- 1 tablespoon all-purpose flour
- Orange slices, green olives, fresh coriander for garnish

Wipe lamb dry; with sharp knife score surface in diamond shapes. Combine ginger root, yogurt, lime juice, garlic, salt and pepper. Rub mixture into lamb, let stand 2 hours. Combine coriander, cayenne, cinnamon, cloves and cardamom. Heat and cool. Sprinkle these spices over lamb. Roast 2 to 2½ hours at 325 degrees to 175 degrees on meat thermometer. Remove roast from oven; pour off fat. Combine flour and water to make gravy. Garnish roast with orange slices, green olives and/or fresh coriander. Serve with fluffy rice and gravy.

Representative Kitty Gurnsey, Ada County (Boise)

American Cancer Society, Idaho Division, **Idaho Sampler Cookbook**. *Wimmer Brothers Books, Memphis, TN, 1984.*

INDUCED ABORTIONS

In the United States approximately 1.3 million legal abortions were reported to the Center for Disease Control in 1981 (the latest data available).* The abortion ratio (reported abortions per 1,000 live births) decreased slightly from 359/1,000 in 1980 to 358/1,000 in 1981.

Comparative U.S. and Idaho abortion data are listed below. Both represent occurrence, not residence, data.

	INDUCED ABORTIONS	RATIO PER 1,000 LIVE BIRTHS	RATE PER 1,000 FEMALES, 15-44
U.S. (1981)*	1,300,760	358	24
Idaho (1985)	2,252	141	11

The reporting of induced abortions in Idaho was not required until July 1, 1977. The reported numbers increased from 708 during the last half of 1977 to a high at 2,706 in 1981. The number of abortions reported in Idaho in 1985 was 2,252, the lowest reported since 1978.

No maternal deaths have yet been reported from Idaho induced terminations.

Residence data are also available and presented in this section. These include all Idaho residents who obtained abortions in 1985, regardless of the State of abortion. Tables on pages 72, 73 and 74 reflect residence data; tables on pages 72, 75 and 76 reflect only abortions done in Idaho.

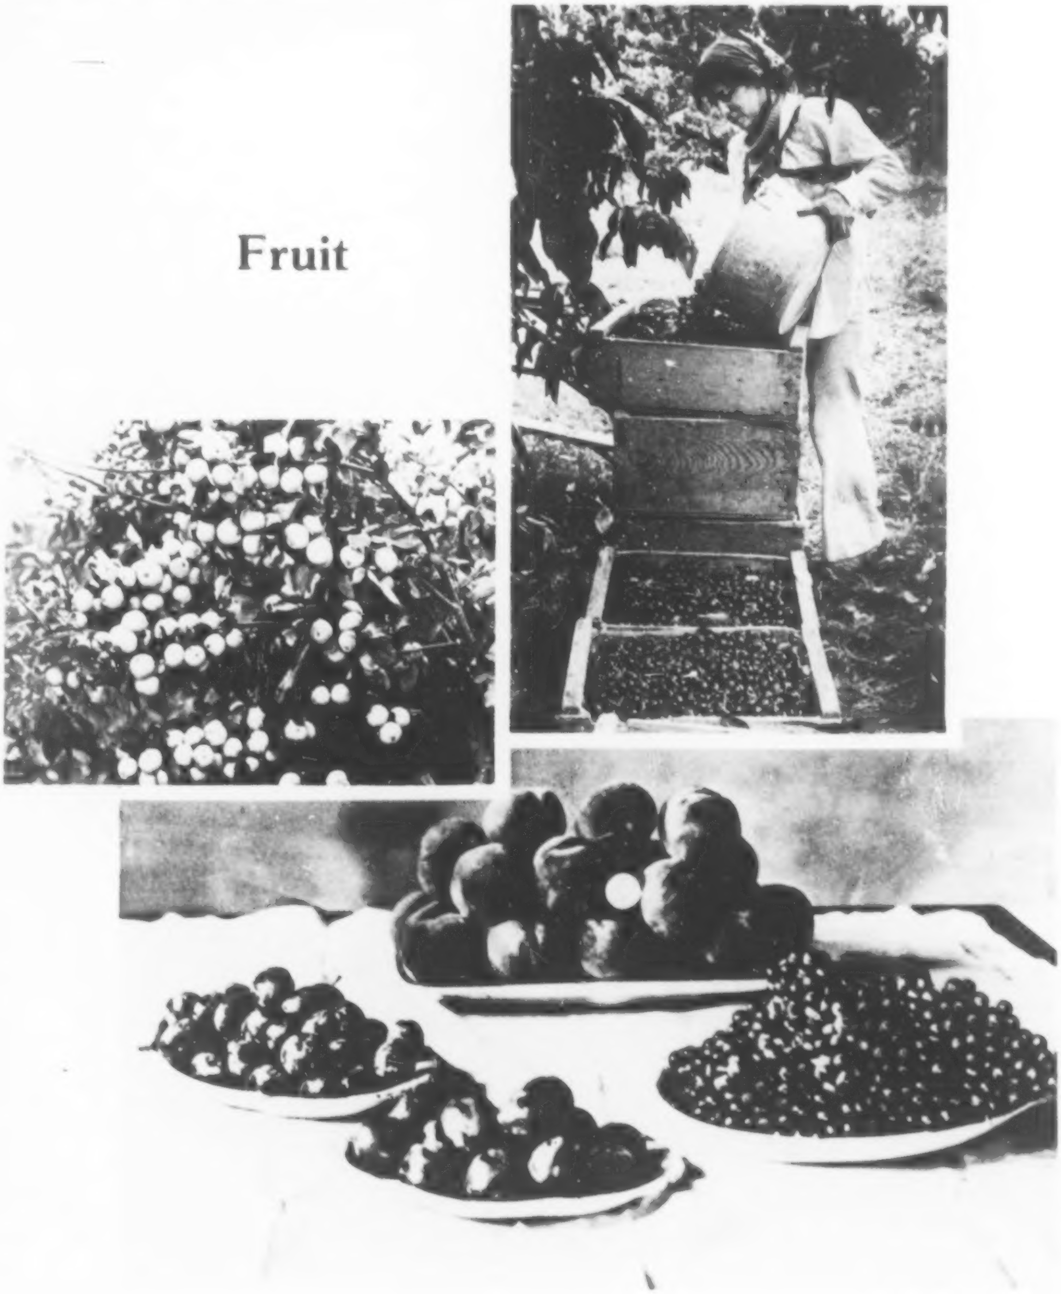
Marriage and Divorce

Fruit



Idaho Historical Society

Fruit orchards abound in southwest and south central Idaho, but can also be found in the state's northern and eastern areas. Apples, peaches, cherries, grapes and pears are just some of the many varieties of delicious fruit grown in Idaho.

FRUITS

HOT MULLED CIDER

- 6 cups apple cider
- 1/3 cup light brown sugar
- 1 (2-inch) stick cinnamon
- 1 tsp. nutmeg
- ½ tsp. ginger
- 12 whole cloves
- 2 oranges, sliced
- 2 lemons, sliced

In a large saucepan, combine 6 cups apple cider, 1/3 cup light brown sugar, cinnamon, nutmeg and ginger. Push 12 whole cloves into rinds of 2 oranges and 2 lemons sliced, using 2 cloves per slice. Bring mixture to a boil, stirring only to dissolve sugar. Reduce heat, cover, and simmer 5 minutes. Makes 6 cups.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection.** Highcountry Publishing Co., Boise, ID

FRUIT CRUNCH

Mix together until crumbly:

- 1 cup flour
- ¾ cup quick oatmeal
- 1 cup brown sugar
- ½ cup melted butter
- 1 teaspoon cinnamon

Press half the crumbs into baking dish and top with 4 cups fruit, peaches, pears, cherries, or whatever you prefer.

Cook until thick:

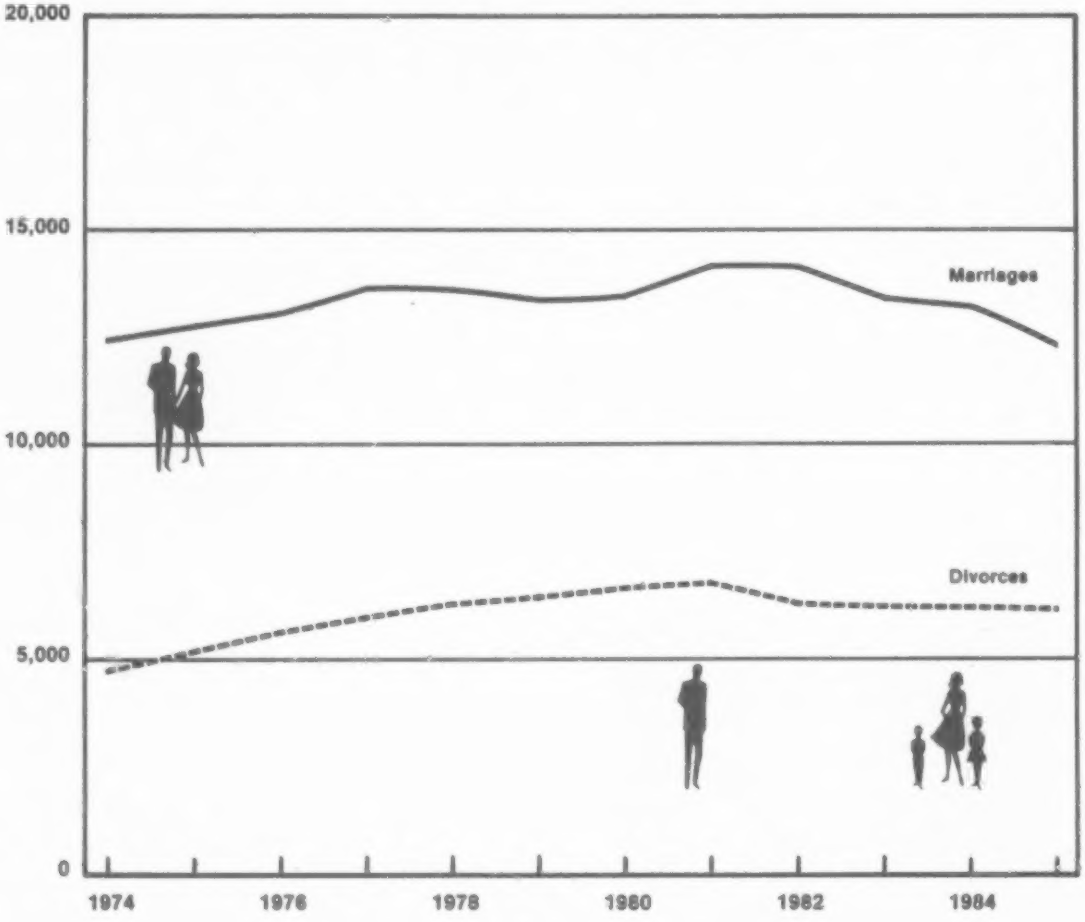
- 1 cup sugar
- pinch of salt
- 1 teaspoon vanilla
- 1 cup water
- 2 tablespoons cornstarch

Pour this with rest of crumbs over top of fruit and bake for 1 hour at 350 degrees. Top with whipped topping or ice cream.

Idaho Horticulture Society, **Oh, So Good! With Idaho Fruit,** Caldwell, ID, 1976

MARRIAGES AND DIVORCES OCCURRING IN IDAHO

1974 - 1985



Both the number and rate of marriages in Idaho decreased again, from 13,264 (13.3) in 1984 to 12,277 (12.2, provisional) in 1985. This decline in the rate is a continuation of the general decline of marriage rates in Idaho; at 12.2, it is the lowest in many years. Even so, marriages occur at a higher rate in Idaho than in the U. S. as a whole: the national rate of marriage was 10.2 in 1985 (down from 10.5 in 1984, and the lowest rate since 1977). However, this difference between Idaho and the U.S. can be accounted for by the high number of nonresidents who marry in north Idaho.

Divorces in Idaho recorded the fourth consecutive numerical decrease in 1985, declining from 6,210 to 6,207 in 1985. The 1985 divorce rate remained at 6.2, the lowest since the mid-seventies. Divorces occur less frequently in the remainder of the nation: the U. S. divorce rate in 1985 was just 5.0, a slight increase from the 1984 rate of 4.9.

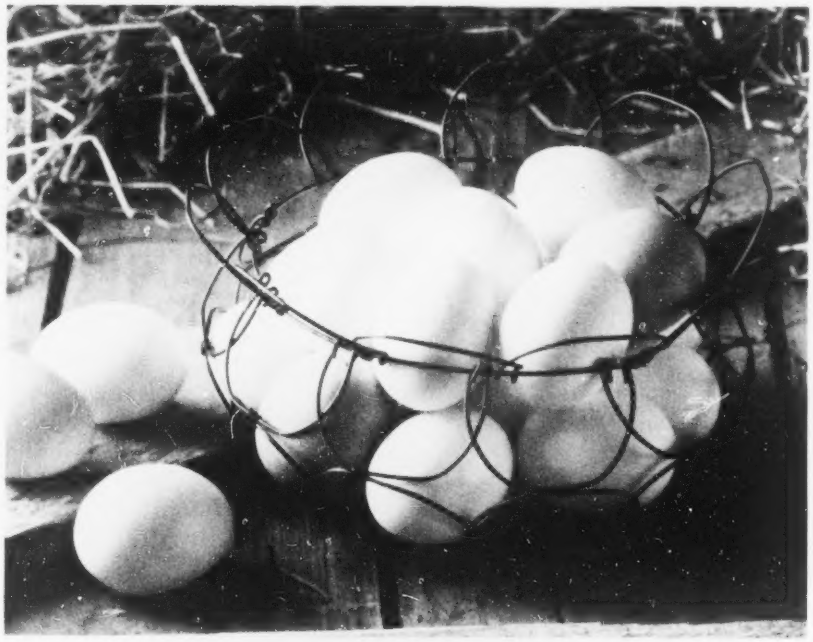
Appendix

Poultry



American Egg Board

"Poultry" encompasses two separate industries: the product (egg) and the source (mainly chickens and turkeys). Both are dietary staples, and are excellent sources of protein. Poultry for meat is primarily a major commercial venture, while egg production can be on a large scale or a small family business.

CHICKEN ENCHILADAS

- 2 (10¾-ounce) cans cream of chicken soup
- 1 (8-ounce) carton sour cream
- 2 cups cooked chicken, cut up
- 2 (4-ounce) cans mushrooms, drained)
- 1 (4-ounce) can chopped green chilies
- ⅓ cup onion flakes or finely chopped onions
- 1 teaspoon chili powder
- ½ teaspoon salt
- ½ teaspoon garlic powder
- ¼ teaspoon pepper
- Butter or margarine
- 12 flour tortillas
- ⅓ pound shredded Cheddar cheese

Mix soup and sour cream together and spread 1 cup of the mixture in the bottom of a 13x9-inch pan; set aside. In a saucepan combine chicken, ½ cup soup and sour cream mixture, mushrooms, green chilies, onion flakes, chili powder, salt, garlic powder and pepper. Cook over low heat just until heated through. In a skillet over medium high heat in enough butter to cover bottom of the pan, fry 1 tortilla a few seconds, turn, and heat until it softens. Spread about ¼ cup chicken mixture on each tortilla. Fold sides of tortilla over filling. Roll and place seam side down in soup mixture in pan. Repeat for each tortilla. Cover enchiladas generously with remaining sour cream and soup mixture. Sprinkle with cheese. Bake at 450 degrees for 8 minutes or until cheese is melted. Yield: 1 dozen enchiladas.

IDAHO POTATO-SESAME CHICKEN

Preheat over to 375° and line 9½ x 13-inch baking pan with foil.

- 1 frying chicken
- ½ cup flour
- 1 tsp. salt
- ¼ tsp. pepper
- ½ cup margarine
- 1 cup dehydrated potato flakes
- 2 Tbsp. sesame seed

Rinse chicken in cold water; cut thighs from legs. split breast.

Drop chicken parts in paper sack containing flour, salt and pepper; shake sack to coat lightly.

Melt margarine over low heat in flat pan. Roll chicken pieces in melted margarine.

Mix potato flakes and sesame seed together in flat pan. Turn chicken in flakes and seeds. Place in foil-lined baking pan. Bake approximately 1 hour.

GRAIN

Front Cover

Grain production is a large part of the overall agricultural industry in Idaho. Some of our most basic foods, such as breads, cereals and flour, are derived from grains like wheat, barley and oats. Grain growing and harvesting are done statewide.

CHOCOLATE BUTTERMILK CAKE

1½ cups butter or margarine
1½ cups firmly packed brown sugar
1½ cups sugar
3 eggs
2½ squares (ounces) melted chocolate
1½ teaspoons vanilla extract
1½ teaspoons salt
3 cups all-purpose flour
¾ cup buttermilk
1 cup boiling water with 1 teaspoon soda

Cream butter and sugars together. Beat in eggs, melted chocolate and vanilla. Add salt to flour and beat in alternately with buttermilk. Then add boiling soda water. Pour into 3 greased and floured layer cake pans. Bake at 350 degrees for 35 to 45 minutes. Top with favorite chocolate frosting.

Governor and Mrs. John Evans, Ada County (Boise)

American Cancer Society, Idaho Division, **Idaho Sampler Cookbook.** *Wimmer Brothers Books, Memphis, TN, 1984.*

HERB-ONION-CHEESE BREAD

½ cup milk
3 tablespoons sugar
1 teaspoon salt
1 tablespoon butter or margarine
1 package yeast
½ cup warm water
2¼ cups all-purpose flour
½ small onion, minced
½ teaspoon dried dill weed
1 teaspoon dried rosemary, crushed
½ cup shredded Cheddar cheese

Scald the milk and dissolve the sugar, salt and butter in it; cool to lukewarm. In a large bowl dissolve the yeast in the warm water. Add the cooled milk, flour, onion, herbs and cheese and stir well. When the batter is smooth, cover the bowl with a towel and let rise 45 minutes. Stir down and beat vigorously for a few minutes, then turn into a greased bread pan. Let stand in a warm place for 10 minutes. Bake for 1 hour at 350°.

FISH/WILD GAME

Back Cover (Fish/Wild Game)

Hunting and fishing are very popular activities in Idaho, providing recreation as well as being a source of food. Shown is a typical scene at one of our many fishing spots.

5-HOUR STEW

2 lb. cut up beef, elk or venison
2 (8 oz.) cans tomato sauce
1 c. water
1 c. chopped celery
½ green pepper, chopped
1½ tsp. salt
¼ tsp. pepper
2 large red potatoes, cut in ⅛'s
6 carrots in 1 inch pieces
1 slice bread, cubed

Put all into Dutch oven in order given. Cover tightly and cook for 5 hours (or longer) at 250°. Stir once or twice.

Mary Hersley

1000 SPRINGS TROUT AMANDINE

Clean and bone as many trout as you like (one fish for each serving). Lay flat on a lightly oiled sheet of foil on a broiler pan. Brush the boneless trout lightly with melted butter and sprinkle with crushed sweet basil.

Meanwhile, saute 1 Tbsp. of sliced almonds in butter until nicely brown. Add lemon juice. Broil trout for about 2 minutes under high heat. Remove from broiler. Spread the sauteed almonds lightly over the trout and return to oven for another 2 minutes at lower heat. Garnish with lemon slices and parsley and serve immediately.

Hopper, Fran, **Fran Hopper's Idaho Cooking Collection.** *Highcountry Publishers, Boise, ID.*

ROAST MALLARD DUCKLING SUN VALLEY STYLE

Two 2 lb. Mallard ducks (oven ready)
Salt and freshly ground pepper
4 Tbsp. soy sauce
½ cup oil
½ stick butter
½ lemon

Cut the ducks lengthwise in halves and wash under running water. Pat dry and sprinkle with salt and pepper. Smother them with 4 Tbsp. soy sauce and set aside for about 30 minutes.

In a skillet large enough to hold the 4 duck halves, heat the oil well and brown ducks for 5 minutes on both sides. Have the sides up when you generously cover with butter bits and put into 475° oven for 15 minutes.

Baste with the drippings about every 5 minutes. The results should be medium to medium rare. Sprinkle with lemon and serve.
